Index of help topics:

hello	A simple function doing little
ted-package	What the Package Does Using Title Case

Maintainer

Ted, The cat who believes he's a dog! <ted@somewhere.com>

Author(s)

Ted, The cat who believes he's a dog!

hello

A simple function doing little

Description

This function shows a standard text on the console. In a time-honoured tradition, it defaults to displaying *hello, world*.

Examples

```
hello()  
hello("and goodbye")
```
